Company introduction

There is a scene called the scene of the country

About/Guozhijing

01 Company profile

Let the design start from the heart and succeed in action

In 1993, our design center has become one of the best furniture design teams in China. From the perspective of the home form of the Chinese market, we focus on the design of market-oriented goods, take customer needs as the center, and create a more efficient office life for customers through the application of design aesthetics.

Quality, cast the product character

We focus on the furniture industry on the road to create a future! In 2012, in the name of the national landscape, we continue to stride on the road of furniture industry, before this, we already have a mature team system. Now, more than ten years of enterprise development, full of recognition and honor, let us always stand in the forefront of the industry.

There is a scene called the scene of the country

We strive to, with the professional service spirit, a full range of close to customers, in the urging of many achievements, adhere to the contract and trustworthy, excellence, equality, love altruistic enterprise values, strict control of product quality, so that the country's landscape all over the country and even the world. A vision of the world, a vision of the future. Create a more beautiful scenery of the furniture industry!

01 Corporate culture

Corporate vision

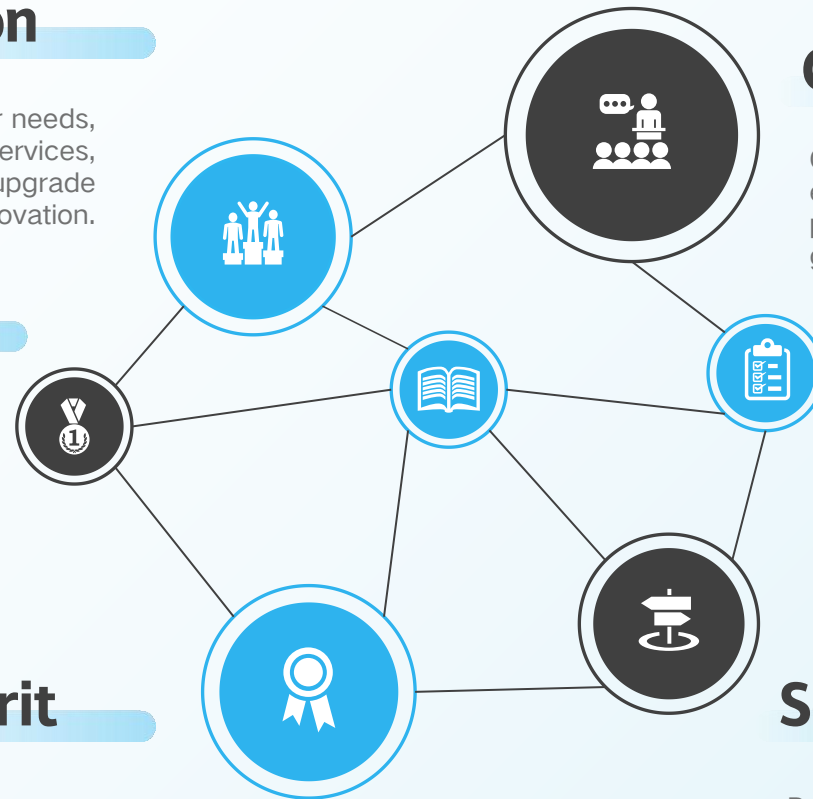

Focus on industry development and customer needs, continue to provide customers with more valuable services, and help the traditional manufacturing industry to upgrade with scientific and technological innovation.

Enterprise mission

Pursue the common development of enterprises and employees, and become an enterprise that employees are proud of and society respects.

Enterprise spirit

Fair, solidarity, hard work, pragmatic humility.

Corporate values

Contract and trustworthy: practice words to implement, excellence: practice perfectionism, equality and love: practice for partners to do their best, love altruism: practice good deeds, think altruism.

Business philosophy

Pursue both material and spiritual happiness of all employees and contribute to the progress and development of human society.

Service concept

People-oriented customer first extreme efficiency perfect

01 Corporate culture

As hard as anyone

Study hard, harder than anyone. And perseverance, continuous improvement. If you have time to complain, it is better to move forward, even if it is only an inch, and strive to improve.

Be humble, not proud

"Modesty benefits" is an old Chinese saying, a humble mind can summon happiness, but also can enhance the mind. Pride makes people hate, it brings people slack and failure. Talent is a gift from heaven, and the use of one's talent for "public" is the first righteousness, and for "private" is the second righteousness, which is the essence of the virtue of modesty.

Reflect every day

Every day to check their own thoughts and behavior, focus, look at yourself, is not selfish, there is no cowardly behavior, will shake the heart calm down, sincere reflection, there is a mistake to change.

Six points of progress

Be thankful to live

Do not forget to repay the kindness of a drop of water. Alive, is already happy. "Gratitude", like underground water, moistens the foundation of my moral values. As long as you are alive, be thankful.

Good deeds, think altruistic

Where good deeds are accumulated, there will be lingering celebrations. Be kind to others and care for others in your words and deeds. Truly for each other's good, is the greatest good.

Don't worry emotionally

Don't fret, don't fret, don't be angry all the time. Life is a whirlwind, alive will encounter all kinds of difficulties and setbacks. We must not be defeated by them, we must not escape from them, face them head-on, resist them, do not forget the original intention, and strive to do what needs to be done.

01 Corporate culture practice

**We are a
united team**

In order to achieve the material and spiritual happiness of all employees, our company has decided to introduce a new business philosophy, aimed at improving our heart and expanding our business capabilities. In this era of rapid change, continuous learning and having the right mindset are important, so we encourage all employees to engage in reading as part of achieving personal and company goals.

We will also organize regular reading sharing sessions to give everyone the opportunity to exchange ideas and inspire each other. In addition, we also welcome you to recommend your favorite books, so that more people can share your wisdom and reading experience.

PART TWO Product introduction

Main: Medical guide table, nurse station, triage table, treatment cabinet, disposal cabinet, diagnosis and treatment table, infusion chair, waiting chair, diagnosis and treatment bed, doctor's office and other medical furniture.

02 Guidance table

The guide table symbolizes the image and grade of the hospital, and realizes the intelligent service system in function. Patients and patients' families can self-guide, inquire the medical process, and handle the manual consultation service of the card. The design is measured according to the actual size, rich color, perfect combination of aesthetics and functionality, fully realize the simple medical care process of functional zoning, standardize the environment of the ward and enhance the image of the hospital.

02 Nurse station

The whole station distinguishes the working position according to the function, and designs the high and low table, on the one hand, protects the patient information registration, on the other hand, shields the medical staff workbench, and avoids the operation interface at a glance. The inner stainless steel skirting line deepens the layer of the station body and prevents the foot from touching, and the arc treatment of each corner is done to create a "home" comfort, avoid the cold feeling of the hospital in the past, more comfortable and humanized design, and add several textures with color, and the integration of artificial stone is nothing more than to increase the layer of the hall.

02 Triage table

The main function of the triage table is to facilitate patients to seek medical treatment, to relieve patients' worries and difficulties, to shorten the treatment time according to the emergency of the disease, and to provide convenient and fast services for patients. Establish a good doctor-patient relationship, win the trust and praise of patients, and play the window function of the hospital.

02 Experimental bench

The experimental platform is used by hospitals, schools, chemical plants, scientific research institutes and other enterprises and institutions for experimental testing and storage of instruments. According to the location, it is divided into: central experimental platform, side experimental platform and corner platform; According to the material is divided into: all-steel test platform, steel-wood test platform, all-wood test platform, PP test platform, aluminum wood test platform (now basically eliminated). There are also some high cabinets: fume cabinets, medicine cabinets, utensil cabinets, gas cylinder cabinets, explosion-proof cabinets, glass cabinets, etc.

02 Treatment cabinet

The treatment cabinet is mainly used in the dispensing room, treatment room and disposal room of the hospital. From the functional division design, the hierarchical classification of clean and dirty goods is considered, emphasizing the prevention of cross infection, and fundamentally providing users with a safe and clean use environment.

02 Disposal tank

A disposal cabinet is a device used to store and manage medical waste and contaminants. It is usually made of stainless steel and has reliable sealing and protective measures to ensure that waste and contaminants do not leak or cause harm to the environment. In addition to storing and managing waste and contaminants, disposal cabinets can also be used for sterilization and disinfection. It is an important medical device that helps protect the health and safety of healthcare workers and the public.

02 Diagnostic table

The clinic table of medical furniture is different from the general desk, which is specially customized for the doctor's work, so the clinic table design should take into account the different characteristics of each department, such as dental clinic, general clinic, Chinese medicine clinic, expert clinic and pediatric clinic and so on.

02 Department of pediatrics

The pediatric consulting room is used for the diagnosis and treatment of children. The furniture and facilities are equipped with a diagnosis table, a diagnosis chair, a patient chair, a diagnosis bed, a computer, a printer, a filing cabinet and a wash basin.

02 Infusion chair

The infusion hall is an infusion treatment unit for outpatient/emergency departments. It should be close to the nurse's station and infusion dispensing room, with consideration of seat spacing, convenient for the treatment cart to be wheeled through, and the space required for the injection operation of the medical staff. Each infusion station is equipped with a call and charging system. The infusion chair develops from a simple seat to a multi-functional, comfortable, safe, environmental protection and other directions. High-end infusion area can also pay attention to comfort and privacy, so that patients can also have the company of family members while transfusion, but also better care of patients, with calling, charging, item storage, bookshelf and other functions.

02 Changing room

In order to achieve a comfortable changing environment when medical staff enter the work and leave the work, the product has been extended design, the cabinet door is equipped with a pictoscope, in the short changing process, you can organize your own grooming instrument, the cabinet door is partially opened with a ventilation design, so that the memory items can better maintain a balanced effect with the external temperature.

02 Doctor's office

The doctor's office is an important department in the hospital, it is the bridge between the doctor and the hospital. In the doctor's office, doctors can communicate and exchange with other doctors, share medical knowledge and experience, and improve the medical level and service quality. The doctor's office is also responsible for coordinating the work of the hospital, such as medical examination, diagnosis, treatment, rehabilitation, scientific research, etc., to ensure that the hospital's medical services can be smoothly carried out.

ADMINISTRATION

Doctor's office: belongs to the doctor often in and out of the office place, the design must meet the medical staff's daily office needs, simple and refreshing desk for daily office. Secondary cabinets and file cabinets are used for file storage. Always maintain a simple, relaxed and efficient design style.

01

DIRECTOR

Hospital director office furniture design needs to take into account functionality, comfort and professional image. A good design can improve the work efficiency and comfort of the director, but also reflect the professional image of the hospital.

02

DEAN

The Office of the President of the Hospital is the comprehensive administrative office of the hospital. Under the leadership of the president, it is responsible for the administration of the whole hospital.
